Note: Concern Info refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations made. Those statements of allegations do not necessarily reflect the legal standard upon which inspections would be made.

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
61158	4/1/2025	4/17/2025	Mark Murphy	Open Dumps Open Burning Scrap Tire Dump	Maysville /DeKalb	KCRO	MU	Other
Concerned Party:		Anonymous						
Concern Info:		Illegal dumping and burning in and around pond connected to waters of the state (West Fork Lost Creek) Dumping from Roofing Family Mowing and Northwest Dumpsters CP said they're both in there dumping often All sorts of things including tires Burning stuff in the ditch at night						
		CP says individuals dumping were rumored to be associated with MFA Agri Services, who had a hard time getting insurance due to dumping on their site so they believe they've resorted to dumping at this pond as a solution.						
Conclusions:		Letter sent to the property owner with the solid waste and open burning regulations.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
61168	4/1/2025	4/25/2025	Nawl Bik	Animal Feeding Operation Odor	/Newton	SWRO	BM	Site Visit
Concerned Party:		Anonymous		Stormwater Contamination				
Concern Info:		Caller stated that the compost shed that houses chicken mortalities are overflowing. Caller stated that the operation has six barns, and the compost shed is located near the entrance to barns 4-6 off of Raven Road. Barns 1-3 are located off of H hwy. Caller stated that they are concerned about the odor and the potential for water pollution from the poorly managed compost area.						
Conclusions:		SharePoint #12968 There were no observable water quality problems regarding this specific concern.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
61235	4/7/2025	4/16/2025	Leevi and Abby Babb	Open Burning	/Newton	SWRO	GE	Communication In Person
Concerned Party:		Anonymous						
Concern Info:		Caller states that someone is burning 10-15 tires, mattresses, carpetting, and household waste for at least 3 days in a row. Caller states that they told the source of concern that they shouldn't be doing that, and then they started piling limbs and branches on top of the pile to hide the burned material.						
Conclusions:		SharePoint #13042 No further action necessary at this time.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action

61280	4/10/2025	4/16/2025	Unknown	Open Burning	/Stone	SWRO	BD	Memo
Concerned Party:		Anonymous						
Concern Info:		Some very black smoke coming from a burn pile off Hwy 13 and Stoneridge Center Road. Back near D2 detailing. Not exactly sure which business is burning, but the smoke is visible from Hwy 13 as your traveling toward Kimberling City. Black smoke is very thick.						
Conclusions:		SharePoint #13101 The source of the fire was unable to be determined, no violations of 10 CSR 10-6.045 were observed during the investigation.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
61318	4/15/2025	4/16/2025	G&R Construction, Inc. Bret Palliser, Owner	Asbestos Fugitive	Odessa /Lafayette	KCRO	JS	Other
Concerned Party:		Anonymous						
Concern Info:		A contractor started removing the roof from the Odessa post office this morning (04/15/2025). Removal project is creating dust, and the caller was concerned that the roof might contain asbestos.						
Conclusions:		Renovation consisting of using a reciprocating saw to cut through asphalt roofing and the underlying fiberglass was conducted without a prior inspection for asbestos. Any work that would further disturb existing materials was complete at the time of the investigation. Furthermore, the amount of material disturbed was below the regulatory threshold. A letter of Unsatisfactory Findings is being issued to G&R Construction, Inc. for failure to inspect for asbestos prior to renovations.

61339	4/17/2025	4/17/2025	Wilber Miller	Open Burning Land	/Henry	KCRO	MC	Phone Conversation
Concerned Party:		Amy Jordan						
Concern Info:		Via Webform -Inquiry/Question - Submitted at 7:41 am Thursday, April 17, 2025						
		What Question do you have? If someone is burning their land to plant crops, and it is outside city limits, does the burn still need to be so far away from occupied residential area?						
Conclusions:		There are no setback requirements for agricultural burning related to the growing or harvesting of crops. Activity appears not to violate state regulations. Discussed with concerned party. No site visit conducted.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
61343	4/16/2025	4/23/2025	C&L Grease Michelle Wald	Odor	Carterville /Jasper	SWRO	JW	Site Visit
Concerned Party:		Danelle Hurtado						
Concern Info:		From Webform: We had another septic/sewer smell Saturday with a very strong odor while we were having a BBQ outside with guests. Most of the guest left because of the horrid smell. I feel like the more we make complaints, the more the residents in Carterville are taunted. Several neighbors in this area smelled it also. We should be able to go outside without having to smell this horrid company. It had not really smelled for at least a week prior to this. We assumed the company had dealt with the issue. Today is 4/16/2025. It smells again. My mother that attended our BBQ said we should just move and not have to deal with this issue. Well, how can we move, how can we sell our home? This is not fair to us residents having to deal with this on almost a daily. I was also at Caseys like 2 weeks ago in Carterville MO. They are building a business beside Caseys and a construction worker was inside talking to the cashier and asked the cashier why the town smelled so horrible. The cashier responded and said it is a waste company up the road. The construction worker said he could not believe it smelled so bad here. And asked how people deal with the smell.						
Conclusions:		SharePoint #13183 I did not observe any violations during this investigation. No action is required.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
61344	4/16/2025	4/21/2025	John Goodwin	Odor Open Burning	Collins /St. Clair	SWRO	BD	Site Visit
Concerned Party:		Anonymous						
Concern Info:		From Webform: Neighboring farmer is injecting swine manure. Concerned with the distance from 3 residential wells. Also burning brush piles with tires. The smell at the neighboring house is horrendous.						
Conclusions:		SharePoint #13188 No violations of 10 CSR 10-6.045 Open Burning Requirements or 10 CSR 10-6.165 Restriction of Emission of Odor were observed. The claim that tires are being used to fuel brush fires were unable to be substantiated, and odors reported derive from land application which is exempt from 10 CSR 10-6.165. Water pollution will be forwarded the issue to address the concern relating to the wells.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
61345	4/16/2025	4/22/2025	Lyle Dunham	Open Dumps Open Burning Scrap Tire Dump	Reeds /Jasper	SWRO	MK	Site Visit LOW
Concerned Party:		Anonymous						
Concern Info:		Concerned Party (CP) called stating that a neighbor started their own trash collection service for the area around 2 to 3 months ago and that they will collect the trash and toss it into heaping piles behind their house and then set them on fire once the piles become extremely large. CP states that they are burning mattresses, couches, and several tires, among other items.						
Conclusions:		SharePoint #13193 I will issue a Letter of Warning for Illegal disposal and open burning. RTC 6-25-2025						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
61347	4/16/2025	4/23/2025	James " Jim" Doke	Asbestos	Brighton /Polk	SWRO	JW	Phone Conversation RTC
Concerned Party:		Anonymous						
Concern Info:		Old gas station and garage has been demolished. Possible asbestos involved.						
Conclusions:		SharePoint #13199						
		During the investigation, I observed evidence of illegal open burning and improper disposal of demolition waste. I also noted failure to inspect/notify for asbestos because the demolition involved a commercial structure. This triggered a Letter of Warning report with No Response Required since the responsible party resolved the required actions prior to receipt of the letter.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
61348	4/16/2025	4/18/2025	Blevin's Asphalt	Fugitive Particulate Matter	Brookline /Greene	SWRO	JW	Phone Conversation
Concerned Party:		Rick Carson						
Concern Info:		See concern 10987. Rick Carson with the next-door auto salvage facility is concerned about the levels of dust being emitted from Blevin's Asphalt.						
Conclusions:		SharePoint #13200 I did not observe any violations during this investigation. No action is required.

61359	4/15/2025	4/22/2025	Jimmy Thomas	Open Dumps Open Burning	Wentworth /Newton	SWRO	GE	Communication In Person
Concerned Party:		Amber Tindell						
Concern Info:		Jimmy Thomas has repeatedly piled up his trash in his backyard. He has metal and other materials and trash around his house. It spreads to neighboring properties and burning the waste at night.						
Conclusions:		SharePoint #13219 No further action necessary at this time. When in the area a drive by will be conducted.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
61369	4/18/2025	4/23/2025	Michelle Wald	Land Application Odor	Carterville /Jasper	SWRO	JW	Site Visit
Concerned Party:		Ryan McCoy						
Concern Info:		From an online form: "C&L Grease has been cited for odor and other violations but they are continuing to dispose of foul smelling waste on their property that can be smelled for miles. The problem is their permit to dispose of untreated waste water by dumping it on the ground. The permit needs to be revoked immediately. This permit issued by the DNR has ruined the quality of life for everyone within several miles of this business. Our employees are constantly subjected to this horrible and nauseating smell and we can't do anything about it. It is absurd that the DNR permits this type of activity, especially in a populated area. Additionally, there is solid waste all over their property at 1140 E. 1st in Carterville."						
Conclusions:		SharePoint #13225 I did not observe any violations during this investigation. No action is required.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action

Concerned Party:		Anonymous						
Concern Info:		From Webmail Form: An excavator has been brought in to tear down some old buildings in Walnut Grove. It has been mentioned that they possibly have Friable Asbestos in the roofs. These are a block away from our school where children could possibly be playing while this is done. Could someone please look into this matter.						
Conclusions:		SharePoint #13252						
		I did not observe any violations during this investigation. No action is required.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
61408	4/22/2025	4/24/2025	Cardinal Crest Homes	Open Burning	Smithville /Clay	KCRO	JS	Email LOW
Concerned Party:		Fire Chief Dave Cline, Smithville FPD						
Concern Info:		Fire Chief Dave Cline of the Smithville Area Fire Protection District called to report a builder burning construction debris. He said the pile was approximately 30 feet in diameter and 6 or 8 feet tall and contained prohibited materials such as shingles, treated material, and strand board. At the time, the builder was not on site, but a concrete crew was out there who had apparently been directed to light the fire. The fire department knocked the fire down and asked the builder to cover it with dirt. Cline said the contractor said they do this all over Platte and Clay County and didn't know there were restrictions against it. They put some dirt on it, but it is still smoldering (as of 4 pm 4/22/25). He said there is nobody on site currently, but he is going to contact the builder to put more dirt on it. He said the pile has burned down to approximately 4 feet tall and 20 feet across. The builder is Cardinal Crest Homes and the on site contact is Ethan Fugget.						
Conclusions:		The investigation found evidence of improper disposal of construction waste by open burning. A Letter of Warning will be issued to Cardinal Crest Homes for open burning of prohibited items.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
61429	4/23/2025	5/1/2025		Water Discoloration Odor	/Platte	KCRO	JJ	Other
Concerned Party:		Anonymous						
Concern Info:		CP called about the creek behind her house has a reddish tint and a stale/musty odor. The roofer that was working on the roof noticed this and had her call in. She said that with the recent rain it might not be anything, but she was concerned about the color and smell.						
Conclusions:		No further actions required.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
61434	4/16/2025	4/17/2025	Mark Steinbecker	Land Application Odor	/Perry	SERO	MR	Site Visit
Concerned Party:		Roy Glass						
Concern Info:		CP States: Farmer next to their property is dumping waste from a feedlot at another location onto farm ground next door. Waste is being spread across the farm field with equipment. When it is applied it causes a terrible odor for weeks and they are also concerned about runoff into a nearby creek.						
Conclusions:		20250417, verified ownership of site of concern via MO parcel viewer as Mr. Mark Steinbecker. Verified a stream that runs from his property to neighbor across the street and then to the Schawanee Springs Branch creek at Hwy 61. 20250418 Drove to Perryville site local and inspected the first ditch north of concern site and first ditch south of the concern site, neither had visible pollutants leaving concern site to these ditches. Viewed the creek in question and saw clear drainage from a culvert on the CP property feeding into the creek, there were water bugs and small minnows in the water, I could see no pollutant or sediment entering the stream or leaving the property. I stopped at the CP site gate and observed there were two separate dark areas that could have been from land application or from cows walking around, both areas were estimated at more than 100 ft from the creek or the public road, the field looks used for open grazing but there were no animals present during my investigation, the field contain rooted ground grasses as best that I could tell and no sediment was leaving the site. No Missouri Clean Water Law violations were identified during the investigation. No runoff issues were observed at the time of the investigation.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
61463	4/24/2025	5/6/2025	Doug Phillips and April Stevens	Scrap Tire Dump Open Burning	Bolivar /Polk	SWRO	GE	Communication In Person
Concerned Party:		Anonymous						
Concern Info:		in the back corner of the property there is a large pile of tires that has been taken from Jay Barnett of Barnett Salvage. Burning of tires has also been occurring on the property. In addition to the tires there is appliances and mattresses on the property. Phillips works at Browns Iron and Metal which has connection to Barnett Salvage. April Stevens works for Barnett Salvage also.						
Conclusions:		SharePoint #13327						
		No solid waste violations noted on the property.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
61464	4/23/2025	4/23/2025	Unknown	Other	/Howell	SERO	JE	Other
Concerned Party:		Wayne Johns						
Concern Info:		Received by email. CP States: My concern are the Kim trails that are in the sky. And no, it's not an imagination. It's fact. I'm watching them fly back-and-forth. Shut it off turn around and the trails. Keep going all over the place. We're over three days now in Mountain View, Missouri. That's what's been going on. Every time this happens a few days later we end up with tornadoes in the area. Doesn't matter we've had more tornadoes lately than we've had the whole time. I've lived here in almost 13 years.. I don't believe this crap that is global warming. I believe the crap of flying over and dumping chemicals on us should stop.						
Conclusions:		Referred concerned party to EPA Region 7 and the Federal Aviation Administration.						
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
61472	4/25/2025	5/2/2025	Jonah Popa	Open Burning	Springfield /Greene	SWRO	BD	Site Visit
Concerned Party:		Anonymous						
Concern Info:		See concern #12706. New email concern is as follows: "Previously reported in March. Responsible Party is burning construction waste that is be removed the the home. Lots of black smoke and has a metallic/chemical smell."						
Conclusions:		SharePoint #13332						
		No open burning violations were able to be confirmed at the time of the site investigation. No further action required.						
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
61473	4/25/2025	4/25/2025	Landyn McGlothlin	Open Burning	Verona /Lawrence	SWRO	JW	Phone Conversation LOW
Concerned Party:		Erica Phillip						
Concern Info:		Erica Phillip called to report that her neighbor burned down their house with the permission of the local fire department. The fire department watched the house burn down. The property owner is allegedly demolishing the remains and transferring them into a dump truck. Phillip stated that smoke and debris flew and settled onto her property. The house supposedly caught on fire in December and the new property owner decided to burn the rest of the house down today. Phillip is concerned about the fate of the demolition waste.						
Conclusions:		SharePoint #13341						
		During the investigation I found evidence of illegal demolition of a residence via open burning with the assistance of a local fire department. There was also no asbestos inspection or notification to the department, a necessary step in compliance since the structure became regulated once the fire department started using it for training purposes. A LOW has been sent to the property owner and the Aurora Fire Protection District which requires proper disposal of remaining materials and a post-notification of demolition to the department.

Concerned Party:		Rick Rogers						
Concern Info:		Rick Rogers called to report an asbestos release during an abatement project at Neosho High School. Rogers is unsure whether the abatement contractors are certified and/or notified DNR. Rogers stated that the school is still in session and he is skeptical that the contractors set up proper quarantine procedures.						
Conclusions:		SharePoint #13386 I did not observe any violations during this investigation. No action is required.						
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
61515	4/23/2025	4/29/2025	Lori Stuart	Open Burning	Columbia /Boone	NERO	SB	Communication In Person
Concerned Party:		Travis Wise						
Concern Info:		The caller reports that something plastic is being burned today at the property being occupied by Lori Stuart. She is a squatter and not the rightful owner of the property. She collects items from dumpsters around Columbia and brings them back to the property and may be burning them for salvage. Other homeless people also live on the property.						
Conclusions:		Exempt burning of household trash. Provided fact sheets and a copy of the open burning rule to the occupant of property. Discussed solid waste disposal requirements. Working on cleaning up from a past Solid waste LOW.						
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
61523	5/1/2025	5/6/2025	Brittany Loftis	Open Burning	Excelsior Springs /Ray	KCRO	DS	Phone Conversation
Concerned Party:		Wood Heights FPD, Lieutenant Scott Shafer						
Concern Info:		Lt. Shafer with Wood Heights fire reports an ongoing situation of illegal burning. Sherifs's office has warned property owner multiple times to not burn materials on property and has responded to calls regarding continuous burning. Some materials have been deemed as explosive. Initial incident occurred on April 29, 2025.						
Conclusions:		No active active burning was found during the investigation. No evidence was found that past burning was done intentionally. I was unable to make contact with the responsible party; therefore, a compliance assistance letter will be mailed with Missouri's open burning regulations.

61547	4/17/2025	4/18/2025	Chad Morrison	Open Burning	Perryville	SERO	JE	Report UF
		/Perry						
Concerned Party:		Cheryl Miller						
Concern Info:		STL County Health Dept received 20250416. Department received 20250417. CP States: I'm not sure if this is the right avenue for this but I was needing to file a complaint in regards to someone burning waste from their firewood and mulch company. We live in the neighborhood on Hidden Valley Lane where Morrison Landscaping and Tree service is in Perryville, MO. The owner of this business has been burning their unused wood, dirt and mulch and the fire has gotten out of hand. According to the Missouri Department of Natural Resources website, any fire of that nature must be less than 80 cubic feet and less than 200 yards from any structures. There are 5 houses within 200 yards of this fire. I feel the smoke being produced is harmful to my health, my families health, as well as the neighbors' health. We have residents in our neighborhood with asthma and elderly with other respiratory illnesses. It is also very dangerous with the high winds we've been having. Any advice you can provide would be greatly appreciated. Thank you for your time.						
Conclusions:		Chad Morrison is being issued an Unsatisfactory Findings for open burning in a manner that is not permitted within 10 CSR 10-6.045.

61557	5/6/2025	5/6/2025	Alacron Lucia Cruz	Open Burning	Kansas City /Jackson	KCRO	MC	Referred to Other Agency
Concerned Party:		Sonja Lloyd						
Concern Info:		My neighbor at 8626 is piling and leaving in trailer on street multiple types of scrap/construction materials torn or taken from other sites on our street for multiple days. Other trailers pull up and add debris to trailer over days. Eventually being unloaded into his yard and then burned multiple times throughout the week. All too often it is very toxic smelling. They incorporate a lot of wood limbs which they pile in yard corner prior to burning the trailer debris I'm assuming to help cover toxic smell. For hours sometimes overnight the fire continues and/or smolders. These fires are usually flames higher than 3 feet and not enclosed they are just lit on open ground. We as a neighborhood have called on a regular basis and had fire dept put out. We've had this problem with this address before. We were able to get this stopped after having air quality person from Jeff city come cite them in past but that was a few years ago and now it's started up again. It seems the fire dept puts out fires and doesn't let them know they cannot continue burning these things. Please help us as we cannot allow our pets out nor sit outside due to the constant stench and toxic smell in air. We have also witnessed large rats in this yard we can only assume are transported from outside trash and debris.						
Conclusions:		A record review did not find any compliance history. This concern is located within the city limits of Kansas City, MO; therefore, the concern was referred to the delegated local agency, which is the City of Kansas City Health Department's Air Quality Program.

61568	5/6/2025	5/7/2025	Ideker - Mosby North Quarry - Concern 2	Fugitive Particulate Matter	Mosby /Clay	KCRO	CK	Phone Conversation
Concerned Party:		Donna Cox						
Concern Info:		Ideker rock quarry is drilling under ground causing large sink holes to appear next to a main rd. The constant explosions and damage to the main road from dump trucks that they won't fix, dump trucks not covered, we can't even open our windows due to the dust. They promised to keep the road up and the dust down and they haven't done anything!!						
Conclusions:		Multiple concerns have been submitted stating that the Ideker Mosby North Quarry is responsible for a sinkhole, is in violation of standards involving water ways and fugitive emissions, and is negatively affecting the houses surrounding the quarry by the blasting.						
		During my investigation, I was unable to confirm any violations of water or dust emissions, but the department will continue to investigate these concerns as appropriate upon receipt.						
		Blasting is regulated by the Missouri Division of Fire Safety; however, they do not regulate blasting for underground mining. Ideker has a third-party testing company that is tracking the blasting with a seismograph. Ideker states they are within regulations and can provide reports from the testing company, Vibratex.						
		The issue with the reoccurring hole was from hitting a high ledge and disrupted ground above the mining operation. Ideker reports that the land owner is aware of the issue and they have a contract with the land owner.

Concerned Party:		Ken Duty						
Concern Info:		The CP lives across the street from the former Riverbend Biodiesel LLC facility. it appears to be closed during a google search. The CP that someone is cleanup the property with open barrels of sludge out in the open cause significant odor which caused the CP to have headaches and nausea. the CP also identified someone dumping stuff down the sewer and storm sewer. Last summer the CP was not able to leave windows open, and it is starting again this summer.						
Conclusions:		At the time of the investigation, the biodiesel facility was shutdown, the fencing was unsecured, and there was product in totes and 50 gallon barrels on the property. This concern was referred to our Waste Management Unit. There was a distinct, unpleasant odor, but it was not strong enough to be in violation of State air regulations.

Concern Info:		Received by email. CP States: Good Afternoon, I am contacting you on behalf of all the residents on Beeler Rd who have been victims of theft and illegal dumping. This has been brought to the attention of the Texas County Sheriff's Office, and they have and continue to do nothing about this. We have been Beeler Rd residents since the summer of 2020, and noticed the first illegal dump in mid November 2024 on Beeler Rd. Since then this has been happening more frequently, as if these criminals are making Beeler Rd and surrounding roads their dump grounds. Items includes in the illegal dump has been baby car seats; full bags of house waste; large flat screen tv's; complete beds (head boards, frames, box springs and mattresses thrown into potter creek, which has then been washed away due to the rain); Dumping of dead fighting dogs (Pit Bull & Pit Bull type breeds such as the American Stafford Terrier ect). Also we had interrupted someone not too long ago who was in the process of dumping their dead dog.; this is just few of the items seen on the 2 mile stretch of Beeler Rd that we take from the main entrance coming off Highway 63. We have been victims of theft, as well as our neighbors up the road, and again Texas County Sheriffs Office is doing nothing about these dangers to the community and environment. Something needs to be done.						
Conclusions:		I did not observe any open dumping on Beeler Road. I encouraged the concerned party to contact the facilities listed above and forwarded contact information to the concerned party.

Concerned Party: Carrie Morrow								
Concern Info: EPA form states, "I live in a neighborhood next to the Honeywell facility. This morning I noticed an acrid acidic smell in the air near my house, and during my morning commute past the plant. My eyes and airways began to burn. This facility has had emergency response hazmat units out in the past to deal with airway pollutants, and I believe they are once again spilling noxious fumes into the air. My lungs are still burning over an hour and a half after driving by the facility."								
Conclusions: No violation at the time of the investigation. Conducted a tour of the facility and did not find any strong odors inside the facility. This may be the result of a recent concerns from an April 28 Hazardous Materials incident where some gases were released that were acidic and caused damaged to the responding fire department equipment. That was caused by some malfunctioning equipment in the facility.

CP has been talking to contractor and was told that it has something to do with downpressure only when it rains? CP states his wife is now in the hospital due to being sick from what is coming up through their house from the sewer. CP states they cannot live at their house anymore due to this. Cp says to come only after it rains as that is when the odor occurs.						
Conclusions:		SharePoint #13720 No violations observed; no action taken.

Concern Info:		Via Webform - Submitted at 5:04 p.m. Wednesday, May 28, 2025 - Date of Incident or First Noticed: 05/01/2025						
We are writing to express our concerns regarding David Rhodus's intention to annex 89 acres around our property, particularly related to the Ideker Mining operations. There is growing apprehension among us and many of our neighbors about what is happening at the Ideker Mining site. The property is being used for surface mining, but we have evidence indicating that deeper mining is occurring. We have observed two holes that extend deep into the land, and the blasting activity has intensified compared to when it first began. We urgently request your assistance in addressing this situation. The annexation would transfer the property to Mosby, a small community that lacks the resources to effectively regulate and oversee Ideker's business practices. Many residents suspect that multiple violations are taking place at this site. We have seen trucks entering the area with trash, and the roads are in disrepair. Our community includes many veterans who are affected by the ongoing mining operations, as the vibrations exacerbate conditions related to PTSD. Our homes are experiencing continuous shaking, leading to property damage for multiple homeowners. We have not even touched upon the environmental impact—dust, runoff, and potential contamination are serious concerns. We live in Clay County Subject: Request for Investigation of Ideker Mining We urge you to investigate whether Ideker Mining is following county and State regulations. Their need to annex additional property raises concerns about them taking advantage of a small town. Below I have attached link with more information Please help us resolve this situation.								
Conclusions:		The department had already received this concern through other submittals to EPA and online assistance request. No new investigation was conducted in response to this concern.

61824	5/30/2025	6/3/2025	Kevin Helton	Open Burning	/Camden	SWRO	CR	Site Visit
Concerned Party: Vivian Fortunato Concern Info: From Email: Hello, I spoke with you earlier this morning, and I wanted to send you some photos of what is going on next-door. There has been a fire burning all day/evening all night into the morning, going on week 2. My husband is up there, and two men showed up and they're in the bobcat, and they told him that they were going to start the next burn pile now (BIG). That is a huge burn pile, and unfortunately, the wind is blowing our way. I understand you gave them permission to burn, but they're not only burning brush, it's been many different colors(Josh from Osage Beach does not understand that this is destroying our lungs and affecting our health) Josh from Osage Beach also states that they have a permit to burn, and they can burn. Josh also stated that he went out there one day when I called, but nothing was burning. That is untrue! He also stated that I am the only one complaining, so I got in touch with the president of the HOA board, and she stated that she is receiving phone calls in regards. The fire department has been out here numerous times, and this last time, this morning my husband met him up there, and the fire department said that this is ridiculous that we ARE getting smoked out at the Towers, and he stated that he's was going to Jeff City to figure out what we can do to stop the burning. I also spoke with Debbie, Bob Vancetavern's daughter, and she said that she was going to get in touch with the company and let them know that we are complaining over at the Towers, but she stated there was nothing she could do about it. Debbie stated that she will be the listing agent of the new condos, but she is not involved with the builder, and would not give me the name of the Business. I really hope that you can stop the burning this weekend so we catch a break. This is just ridiculous, the continuous burning is causing health issues to those around the burning. Conclusions: SharePoint #13780 No open burning violations were observed at the time of the visit. No further action is required.

61826	5/15/2025	5/15/2025	PCE Construction and Country Club of Missouri	Asbestos	Columbia /Boone	NERO	DB	Report UF
Concerned Party:		OSHA						
Concern Info:		Email states, "Tyler Laughlin, Compliance Safety and Health Officer for OSHA (Laughlin.Tyler.G@DOL.gov, Office: 816-483-9531 Desk: 816-502-0319). OSHA has received a concern about a renovation that is occurring at country club at 1300 Woodrail Ave, Columbia, MO. A general contractor, Professional Contractors & Engineers Inc or PCE Construction Inc, was initial hire to do the renovation. A roofing company, Central Missouri Builders, was then hire to remove and replace the roof. The roofing company has stopped work because they believe that the roof is asbestos-containing transite. The roofing company took samples yesterday to try and confirm if the material is asbestos. However, the general contractor is moving forward with the removal of the roofing material without the roofing company. There is a concern that they are making the material friable, not handled properly during transport to the ground, and might not be disposed of as asbestos waste even though is scheduled to go to the Columbia landfill. I checked the databases, and we have not received any notifications for this project. There also could be more remodeling in the structure itself beside the roof without an asbestos inspection.						
Conclusions:		Violation of asbestos regulations - failure to inspect. Corrective actions taken immediately after DNR discussion with contractor. UFNR

Concerned Party:		Jeff						
Concern Info:		This concern is for a commercial property located at or next to 112 W Pine St, Warrensburg, MO 64093. I checked and we have not received any notification for that address. It looks like the structure was some sort of theater, but the concerned party thinks it was a bar at some point. The concerned citizen said that there is an active renovation going on at the structure.						
Conclusions:		The concern citizen is concerned that an asbestos inspection has not been performed and that there could be asbestos exposure to the workers and the public. A site visit was conducted, and the project was discussed with the owner. At the time, only cleaning and seat removal were being conducted. Owner was provided with regulatory requirements to assist with ongoing compliance.

Concern Info:		report states "Someone in my town is working on the Power Plant. Said they were here for work, weren't allowed to talk about what's going on out there, that there was zinc, mercury, cyanide etc. leaking into the air and water, and that if the EPA new the whole place would be shut down. I live in this community; I don't want to be exposed to that for their benefit."						
Conclusions:		Based on the most recent Stack testing data, there have been no air emissions above standards for Thomas Hill Power Plant.

61961	6/12/2025	6/13/2025	City of Leadwood	Odor Chemicals in Public Water System Operations	Leadwood /St. Francois	SERO	TK	Other
Concerned Party:		Jason Chambers						
Concern Info:		Caller complaining about quality of water they are receiving, color, taste, odor, water main breaks, etc, that is occuring every 2-3weeks. Caller thinks they are not providing safe water. Caller explained that the city is not using the water grant they were provided with to make corrections.						
Conclusions:		On 6/13/2025, I spoke with the concerned party (CP). Concerned party stated that his water is discolored alot and there are several water main breaks resulting in boil water advisories. The CP states that he has filters on the line in his house and they become clogged often and ruin his appliances. CP states that this has been an ongoing problem for sometime. I informed the CP that the department is aware of the water quality issues with the City of Leadwood. The city is currently under a boil water advisory for a broken water main and the city has obtained grant money for repairs to the water system. According to the chief operator Karen Nelson, the city has plans for a new tower, new treatment plant, meters, and new distribution lines. I informed the CP that unfortunately the water quality (manganese) may not get much better until the new upgrades are complete. I encouraged the CP to talk to the city and attend city council meetings on questions about the upgrades.

61968	6/13/2025	6/13/2025	Byrd Creek Holdings	Odor	Jackson /Cape Girardeau	SERO	OR	Site Visit
Concerned Party:		Anonymous						
Concern Info:		Driving near property which is located near mine. Smell of sewage and discolored water in nearby creek. This is a property owned by Byrd Creek Holdings. Cape County assessors map has the property listed as Address: 760 STATE HIGHWAY 34 PIN: 14-100-05-00-030.00-0000 Owner: BYRD CREEK HOLDINGS LLC Class: Ag Land They recently installed a sewage system for the subdivision they are building. Not sure if it was properly done or if all the rain is causing the issue but if it is coming from that it is getting into the nearby creek and going into Byrds Creek						
Conclusions:		On June 13, 2025, I reviewed our files and found that there is a draft wastewater permit for a CGCRCSD, Kinder Farms Subdivision WWTF under MO-0140023 at the address provided. There is also a current land disturbance permit under MORA23109. I called the contract operator for the WWTF, Brian Strickland, and discussed the concern with him. He stated that they are in the process of hooking up the package plant for the subdivision, but they are not discharging. He said that there are a few houses built and occupied, and that their sewage is going into the lift station's wet well which they are pump and hauling as needed. I set up a time to do a site visit on June 24th, at 10:30 AM, to view the package plant, lift station, and receiving stream. On June 17, 2025, I met with Joe Tousignant at the WWTF. We first examined the wetwell and I found no signs of recent overflows. There was at least four feet of space from the top of the wetwell to the wastewater level. It was discussed that they are pumping sewage from the tank to the CGCRCSD, Fruitland WWTF for treatment. Next, we inspected the WWTF, which appeared to be holding only stormwater. Joe Tousignant explained that some pipes need to be replaced and the inside of the WWTF needs to be refinished due to rust issues before the plant can operate. We then visited the closest manhole to the WWTF and found no evidence of overflows there as well. The outfall location was near this manhole, so we checked the receiving stream and it appeared clear with no visible concerns. We also observed the receiving stream at the low water bridge over Granite Lane and noted no visible issues at that location either. To conclude the visit, Joe Tousignant and I traveled to the Kinder Farms Subdivision. I did not see any sewage overflows from the individual homes. It was noted that 10 houses were built in the subdivision, but only six appeared to be occupied. I thanked Joe for his time and assistance before leaving. Upon returning to the office, I contacted the facility's permit writer, Thomas Silkwood, and shared my findings. He confirmed with Cindy LePage that there is currently no issue with using the wetwell of the lift station as a holding tank, provided there are no overflows. No water quality violations at this time.

62216	5/6/2025	5/12/2025		Odor	/Franklin	SLRO	RB	
Concerned Party:		Anonymous						
Concern Info:		We recieved an odor concern from the EPA. The CP states: We have been smelling a toxic gas smell that burns our eyes, nose, and throat with immediate headache. We have been reporting to local law enforcement. When we smell this odor it only sticks around for about ten or fifteen minues. We smell this stuff at least once a day if not two or three times a day. By the time law enforcement arrives the smell has moved on or dissipates. We have reason to believe someone is operating a drone to drop something on our propety for us to smell this toxic odor. This has been going on for the last two years. The question i have is, does the EPA have something that I could use to get an air sample when we smell this toxic odor. This may be sent somewhere for analysis. So we can at least know what we are being exposed to.						
Conclusions:		5/12/25 RPB - I spoke with the CP about the issues, he currently believes he is being targeted by some type of toxic gas that is being delivered by a drone. The CP states the odor is present but doesn't last longer than 5 minutes. Although this is concerning, DNR does not regulate mobile sources and odor regulations require an odor to be present for at least 15 consecutive minutes to issue a violation. I have told that CP to reach out to a private company that may be able monitor the air to detect different types of toxins.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
62221	6/2/2025	6/2/2025		Asbestos	Crystal City /Jefferson	SLRO	HH	
Concerned Party:		Anonymous						
Concern Info:		We recieved a referral asbestos concern from the EPA. The CP states: There is a truck trailer back of the lot that contains asbestos from a demolition. Additionally, where a home previously stood there is trash and other unknown debris buried where the house stood. Additionally unknown type debris buried in various places in the quarry. Mark Yieda is the owner of the property.						
Conclusions:		On 06/02/2025 I investigated the above concern, The trailer door is partiality damaged, I looked inside the trailer, there was a matrass and couple of windows, Outside the trailer there is a pile of dirt, I did not see any asbestos material or suspected ACM at this site. Pictures were taken and attached.

62225	4/15/2025	4/17/2025	Bonacker Farms	Odor	House Springs /Jefferson	SLRO	SL	
Concerned Party:		Kevin Duff						
Concern Info:		Our neighbors have a farm across the river about 1/2 mile away. They sell mulch and other products. In March I started noticing a terrible stench coming from that direction. Several people I talked to, that know him, told me he is making Biochar. I started reading about this stuff and it's not good. Pollutants can cause respiratory problems and other issues. The stench seems to be stronger in the evening, but you can pretty much smell it all day long. It's nasty. Smells like "Burning Turds". They are nice people, but this needs to stop. We can't even have our windows open at night. My phone number is 314 960 8342 Kevin						
Conclusions:		4/16/25 SEL - I spoke with the CP on the phone regarding the odor. The CP stated that the odor has been on and off for the last few months, but has become a daily occurrence in the last two weeks. The CP stated it mainly occurs during rainfall/overcast events. CP stated that they had heard from a friend of the Bonackers that the facility had begun making biochar (a type of charcoal that can be made from a wide variety of organic waste, and can be used for soil enrichment. Typically conducted in a low oxygen, temperature controlled process). Internet searches were inconclusive on if the making of biochar would create odors. However, many results stated that biochar can be effective in reducing odors, especially in sewage/manure operations. The CP stated that the odor has been so intense that they have been unable to open windows in their home or enjoy the outdoors. The CP spoke with a neighbor, who said that a few days ago the odor was so bad that they had begun to feel physically sick and had to return inside. The CP has noticed the odor as far as the City of House Springs (roughly a mile away from Bonackers). The CP also stated that they have seen septic/sewage trucks delivering materials to the facility, and occasionally were in the fields owned by Bonackers. I emailed the CP my contact information for future reference. 4/17/25 SEL- I spoke with Kayla Partney regarding the odor concern that was sent in to our office. We discussed potential causes for the odor. Kayla stated that the facility has not conducted any land application in the past year, which I confirmed this information with the Water Section. The facility does have a lagoon on site, that the Water Section has been working with Bonacker farms in the last few months to ensure that it is in compliance with regulations. Kayla also stated that the CP's area is down-wind of their livestock operations. The CP's area is in a river valley, that is east of the livestock. Due to the nature of livestock operations, sometimes odors can increase during wet/overcast weather. We also spoke about the facility's burning operations, including the corn dryer system and the wood stoves on site. I asked if the facility had been making biochar, and Kayla stated that they never have. They had looked into the process in the past, but decided that they would not move forward with it. I thanked Kayla for speaking with me regarding the issue. I will have continued communication with the facility, as ongoing compliance assistance is being provided to the facility. 4/19 SEL- Received an email from the CP regarding that the smell had occurred on a Saturday but had ceased prior to 4/19. On 4/19 the area had received significant rainfall. 4/21 SEL - reached out to the CP via email thanking them for letting me know and asked if they could let me know if they have continued to experience the smell. 4/30 SEL - reached out to the CP via email asking about the odor issue. I asked if the CP had continued to experience any odors in the area. I did not hear a response. There is a strong possibility that the odors would be coming from agricultural operations. The Missouri Department of Natural Resources does not regulate odor from livestock operations. Continuous compliance assistance actions are ongoing with Bonacker Farms and the St. Louis Regional Office.

62226	5/19/2025	5/21/2025	Central Stone Quarry	Fugitive Particulate Matter	Imperial /Jefferson	SLRO	RB	
Concerned Party: Jerry Kassel Concern Info: We recieved a dust concern email that was referred from the Land Reclamation Program. The CP states Hello. We are neighbors with Central Stone Quarry in Antonia Missouri. We received a certified letter from Central Stone stating they are planning to expand their permit at the Antonia facility. As a neighbor I have concerns about this action. Their letter states I have the right to contact your office to request a map of the planned expansion/ long term mine plan. Thus I am doing that now. Number two. The letter says we can request an "informal public meeting". I am also doing that. The letter also states I may make written comments I will do that now. Formal statement: I Jerry Kassel am opposed to any expansion of the quarry operation in Antonia. This quarry has been an abomination since its opening. I will not bring up past atrocities. I will focus on the current daily issues that the neighbors face. 1) blasting is part of the life of a quarry. We accept that. However the neighbors receive no warning. In this wireless world. They certainly could text out a warning 2) biggest issue. DUST. We were promised modern rock crushers with dust suppression systems. They did not deliver. The dust on our homes is ridiculous. 3) dust pollution in our waterways. Heavy enough rains and the local creek flows white with limestone dust. I can't imagine this is legal. 4) spilled rock on our roadways. With the price of cars I try to have mine last a long time. Dodging spilled rock is no easy task here. 5) Dump truck traffic. The neighbor up the road had had 2 dump trucks swerve into his field in the last two years. These are just a few of the problems we face. This quarry was allowed into Antonia before the county had a Planning and Zoning commission. It is a fish out of water. An industrial blasting operation in a RESIDENTIAL area. The expansion of a mistake is not just illogical it's wrong. The county agreed with us in defeating a proposed expansion in 2004. Now 21 years later we will most likely organize and fight again. Thank you for your time and I anxiously await the 2 requested actions I outlined above. Thank you Jerry Kassel Conclusions: 5/21/25 - RPB I visited this site on May 21. When I arrived an employee, Amber, of Central Stone Quarry greeted me at the desk. I told her why I was there and she did not even hang up the phone to give me John Wofford's number and said you need to speak with him. I tried to explain that the investigation was about the quarry and not a records request issue, she seemed busy at the moment. So I drove the site to see if i could see any obvious signs of dust leaving the property. It is a large quarry, but I could not tell where dust may have been leaving the property. I then drove up to a neighboring property to see if I could see any homes covered in dust. I did not see any dust. When I got back to the office I reached out to the CP through email (it was the only form of contact). I called John Wofford on 5/21/25 and he explained to me that the quarry is looking to expand their footprint of mining on land that they already own. He believes the neighboring properties are not happy about this and have deemed the facility a public nuisance. 5/27/25 - RPB- I still have not heard back from the CP so I'm not sure exactly where the CP saw dust come off the property, but as I did not see any violation during my visit, I am closing this concern.								

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
62228	6/12/2025		JCPSD Yorktown WWTP	Odor	Fenton /Jefferson	SLRO	JC	
Concerned Party:		Anonymous						
Concern Info:		We recieved an anonymous odor concern from the EPA. The CP states: The Jeffco public sewer district has had repeated complaints regarding open sewage smells and problems along the sewer line and processing plant on Carol Park Road in House Springs, Missouri. They are attempting to rebuild or repair the processing plant and the area smell smells of raw sewage constantly. It's hard to believe it's not leaking into our water supply or that we are not exposed to hazardous waste.						
Conclusions:		6/12/25-RLA- I looked on satellite imaging of Carol park road in house springs and I could not find obvious signs of a sewer treatment plant. JCPSD Yorktown WWTP was identified as the source of the concern by Josh Willison, WPC. He initially visited the site on 6/2/2025. He observed an odor and some sediment in the creek near Bear Creek Road Bridge. On 6/4/2025, Willison spoke with a representative of the facility who informed him that they were currently working on upgrading their system. The representative also stated they had a clogged pipe which was repaired. On 6/6/2025, Willison revisited the site and did not observe an odor. His full report can be found at the following location: https://moteam.state.mo.us/dnr/deq/enviroforms/Lists/concernlist/Attachments/13800/mo0131024-jcpsd-yorktown-wwtp-20250612-concern-email-jefferson-cw .pdf Willison is planning on visiting the site on 6/20/2025 to follow up on the concern. If the problem persists, he will do a full inspection of the property.

62234	6/10/2025	6/20/2025		Open Burning	DeSoto /Jefferson	SLRO	KC	
Concerned Party:		Anonymous						
Concern Info:		Illegal burning of toxic material, insulation and asbestos.						
Conclusions:		06.11.2025 I looked up the address in ArcGIS to see property details. The property is listed as being owned by Jimmy Jack Johnson and the parcel is surrounded by larger parcels owned by other entities. It is unknown based on the initial interview what exactly is being burned. It does not appear we have ever had contact with this location. I will go out sometime this week to investigate. 06.20.2025 I went to the location and did not note any evidence of burning. I did not smell smoke or see smoke, and did not observe a burn pile. I knocked on the door and waited but had no response. I left fact sheets and a copy of open burning regulations and a business card.

62239	5/2/2025	5/6/2025	Residential	Open Burning	Warrenton /Warren	SLRO	KH	
Concerned Party:		Anonymous						
Concern Info:		We recieved an open burning concern from the EPA. The CP states: I am writing to formally report an ongoing environmental concern involving a resident who is dumping various types of garbage and materials behind their property. In addition to the illegal dumping, this individual is routinely burning wire - often dring late-night hours-which raises serious concerns about the release of toxic substances into the air and soil. What makes this situation especially urgennt is the presence of a stormwater drain located directly behind the residence. It appears that runoff from the burned and discarded materials may be seeping into the ground and entering the storm system, creating a potential hazard for local wildlife, vegetation, and water quality. This activity is not only a threat to the environment but also to the public heath and safety. I respectfully request that this matter be investigated as soon as possible to prevent further contamination and damage.						
Conclusions:		05/05/2025 - Performed a Site visit and observed a burn pit at the back of the house. The material in it was not on fire at the time of my visit. I could not access the property or surrounding property to see what may have been in the fire pit.

62246	6/11/2025	6/16/2025	Bedrock Quarry LLC	Fugitive Particulate Matter	Troy /Lincoln	SLRO	LZ	
Concerned Party:		Darren Davis						
Concern Info:		MSC 6/11/2025: Darren Davis called with a fugitive dust concern for Bedrock Quarry located at 2150 Myers Road, Troy, MO 63379. The CP states that dust is leaving the property boundary. Depending on wind direction he has noticed the dust leaving the property boundary to the North and the East. Mainly dust is coming from trucks on the haul roads. The CP has not seen watering trucks on the haul roads. This location has operated under various names including Crown Quarry (113-P035).						
Conclusions:		6/12/25-RLA- Miranda Cason investigated a dust concern at this facility October, 2022 (Sharepoint 3052)						
		On 6/16/2025 I investigated the fugitive dust (concern) originating from Bedrock Quarry located at 2150 Myers Road, Troy, MO 63379. I did not see dust leaving the property boundary. Wind was calm and the unpaved road was wet. I drove to the property boundary to the North and the East side of the quarry. Mainly that side is used by GM to park cars. No vehicle activities from the quarry. I saw a couple of trucks moving in and out. Did not see dust leaving the property line. The GM security person (Mr Patric McMichael) told me he has not heard such a concern in the past. The manager of the quarry (Terry Bruneg) told me the quarry side of the land is watered as needed. No violation noted at the time of the visit.

62255	5/20/2025	5/28/2025		Odor	/St. Louis City	SLRO	JC	
Concerned Party:		Danielle Pelfrey						
Concern Info:		We received an odor concern from the I-70/I-270 Online Concern Page. The CP is experiencing an solvent, chemical, sweet or fragment odor that appears to come and go, especially in the evenings.						
Conclusions:		5.27.2025 JMC- I called the CP to let them know I was investigating the concern and to collect more information. They did not answer and I left a message. 5.28.2025 JMC-I arrived at 1014 Spruce Street at approxiametely 7:00 AM. I parked across the street from the building and stood outside my car for a few minutes. I did not detect any odors in the ambient air. I then drove around the area with my windows down. I drove East on Spruce St towards Busch Stadium, North on 6th St, West on Walnut St and then south on Tucker Blvd. I drove the area for approximately 15 minutes but did not detect any solvent odors.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
62262	5/15/2025	5/21/2025	Residential	Open Burning	St. Louis /St. Louis City	SLRO	KC	
Concerned Party: Mitch Easter Concern Info: We were referred an open burning concern from the EPA. The CP states: All, Folks, this is getting absurd. Yesterday, while stopping by my home to prepare for a busy weekend of Mother's Day events, I noticed the interior of my house smelled like a chemical fire. It was not my house (thankfully), but—unsurprisingly—it was coming from the neighbors at 4329 Taft. The hazardous tree on their side of the property is now visibly scorched, a clear indication of a hot fire burning beneath the canopy. 4329 is a problem property that I have reported extensively to CSB—many times—yet those reports have yielded no change and no enforcement. Earlier this year, the City appeared to prosecute the homeowner for an illegal addition, but the case mysteriously disappeared from CaseNet (Prosecutor Even Devers was assigned). There has been no explanation. This homeowner failed to follow the required permit process to build that structure, and it has gone unpunished. In addition to the unpermitted construction, this property has multiple violations: hazardous trees previously cited by City Forestry for removal, a dilapidated fence (on their side, not mine), open garbage, landfill-like conditions in both front and back yards, and now toxic open fires. These are clear, sustained nuisances—and references to the appropriate ordinances follow below. Yet, here we are again, with another problem created by the homeowners at 4329 Taft. It begs the question now, that since the case against them was dismissed earlier this year, now the Leriches/Pierrette's seem to think they can get away with whatever they want. What will it take to get this property owner to comply, and the City to enforce rules? Is my yard now contaminated with pollutants and persistent chemicals? Are all of the plants I've been growing for friends and family now contaminated? What about those around who have small children exposed to these chemicals? For each of these infractions, I am demanding the maximum allowable fines be issued—including retroactive penalties and compounded fines for ongoing noncompliance, including up to condemnation proceedings, where permitted under City code. This is entirely unacceptable. The Leriches/Pierrettes at 4329 Taft follow no rules or laws. They clearly and completely disregard the safety of their neighbors and defy safety in all its forms. Both their front and back yards are trashed with junk everywhere *SEE SHAREPOINT Conclusions: 05.16.2025 - 05.19.2025 -- I researched ordinances in St. Louis City to see if there were any differences between State regulations and City ordinances. I can only assess/enforce State regulations. 05.19.2025 -- I called the CP twice to inform them that I have begun the investigation and they did not answer. I also emailed the CP with the same information. 05.19.2025 -- The CP called back and we had a conversation about the concern and any details. The CP gave me access to enter the property if he is not there, but the driveway should be able to see it all. I will go out later this week to visit the site and contact the RP. 05.21.2025 -- I visited the site and took pictures of the front of the property and side from public access areas across the street from the house of concern. I did not note any smoke or smell of smoke. I looked at the front yard and did not observe the alleged "landfill[-like]" conditions but did observe tarp and landscaping materials in the front. I could not see the backyard from the front. 05.21.2025 -- I knocked on the front door and rang the doorbell 3 times. I waited several minutes. I did not hear anyone in the house and no one answered the door. I left a fact sheet on open burning, state regulations on open burning, my business card, and a letter for concerns for leaving at the door. Due to comments from the CP that the owners are from Haiti and there may be language barriers, I also translated the document into Haitian Creole and French to explain why I had come to their property. 05.28.2025 -- I have not recieved a call from the owners.

Concerned Party:		Anonymous						
Concern Info:		We recieved an open burning concern from the EPA. The CP states: For more than three years, the resident has engaged in opening burning or rcreeational burning that releases excessive smoke and pollutants into the air and causing serious public health and environmental concerns. On May 9th, 2025, from 6:00pm to 9:30pm another fire occured that filled the neighborhood with lingering smoke. I had to put a mask on in my house. Couldn't sleep in bedroom because of the smell. This smoke affected a large portion of the neighborhood. The city of St. Louis considered smoke and odor detrimental to health, comfort, or welfare as public nuisance. Also, Missouri's open burning regulations (10 CSR 10-6.045) prohibits burning that causes or constitutes a public health problem. St. Louis City Code Chapter 11.110 indicates that offensive odors can be considered public nuisance. This situation is especially dangerous for those with health problems like me and children with asthma. Ask that the department investigate this matter and take appropriate actions to prevent further violations.						
Conclusions:		05.19.2025 I looked up the address in ArcGIS to see information about the property and owner. The property is currently listed as owned by Joseph Pastor. Zillow suggests that the property has been offered for rent so there may be a renter at this property rather than a Joseph Pastor. I found Joseph Pastor's number online and will call if I cannot make contact with anyone at the site. 05.21.2025 I went to the location and there are two dwellings at this address with a shared porch and two entry doors. 1908a is owned by another entity than Joseph Pastor. I knocked on the door and there was no doorbell. I waited a few minutes but had no response. I left the fact sheet on open burning and regulations at the door with my business card asking the person to call me back. 05.21.2025 I looked at the front yard of the property and tried to see the sides and back from public access areas in front of the building. There was no evidence of burning, no burn pit or burned items. There was no way to view the sides due to the fence, and the alleyway to the back of the multiple properties was blocked on both sides by construction and garbage services. I did not observe any smoke or smell any smoke. 05.23.2025 I waited two days for a callback and never received one.

Concerned Party:		Joe Wingermuehle						
Concern Info:		We recieved an environmental concern from the EPA. The CP states that there is smoke billowing from a chimney covering four square blocks.						
Conclusions:		5/5/25 - RPB I went out to speak with Sue, the EHS manager at the facility. I took a copy of the permit and went over the permit requirements with her. She understood them all, and then I asked to view her method 22 observations. She had them readily available and they were all up to date. No violations had been noted. She was aware of the incident that I was there about, but stated they shut down the furnace as soon as the problem roccurred. 5/9/25 - RPB Although there may have been higher opacity then usual, the facility did not note any violation, and the EHS manager, that it may be happening because they not are burning as frequently. Since they aren't getting as much copper to burn, they don't burn as often, which means the furnace takes longer to get to full temperature, and the workers may be starting to burn before the proper temperature is reached. I said to the EHS manager that they need to wait until it warms up properly. The EHS manager also mentioned that they facility got a new wind sock, and do not attempt to burn on days the wind is blowing at the residential area. see the attached photo.

Concerned Party:		Anonymous						
Concern Info:		We received an anonymous environmental concern from the DNR website. The concern states "Airplanes are spraying thick white substance in the skies daily, causing clouds to form and covering the sunlight. This is called geoengineering. We don't know what that substance is made of and what we are inhaling!"						
Conclusions:		DNR does not investigate concerns from mobile sources.
